

HIGH SPEED INTERNET ACCESS

In our local Area! "An Obtainable Goal"

We are individuals in and around your Neighborhood who understand the true "Value of the Internet", and desire a more reasonable method of access to those valuable resources!

**We are using the "Concept"
"Partners Helping Partners to Attain a Common Goal!"**

Our Goal: *Find 20 to 30 interested subscribers that are willing to purchase this type of access. Then make our proposals to the ISP's with our committed customer base, and secure the proper solution.* (See Site for details)

What can you do to help? Sign up with us, and talk to your friends!

DSL, and other new technologies are available to us, in our area!

Cost: \$35.00 to \$50.00/month based on the number of subscribers.

When you consider the cost of a second phone line, or a cell phone to catch your calls while you are dialed up, plus the cost of dial up, the price of DSL (100 times faster than Dial-up) is cheaper. Not considering the speed advantage of DSL. The ROI, or Return on Investment for providing High Speed Internet access in our area requires approximately 20-30 subscribers for a positive profit to the ISP financing the installation. (His reason for investing)

We can, with as few as 20 to 30 customers, purchase High Speed Internet Access for the homes in our area. At, or below, Current and Customary Rates!

The purpose of this letter: Hopefully, you too value the Internet, and the concept described above. We understand the technology and business structures of the ISP market, and we are prepared to negotiate with the ISP's to adopt the best solution available to us. You will be educated, and involved in that decision, if you desire. Visit our web site for additional information, or call Mark and Shirin Thomas at 735-6206 for more details.

Our Web Site is located at <http://www.Mark-Thomas.com>

This is not a Sales Letter! We are not affiliated with any ISP(Internet Service Provider), nor any Telephone company providing Internet access, or related services!
